

## SAYDEL COMMUNITY SCHOOL DISTRICT

### EDUCATIONAL SPECIFICATIONS FOR BUILDINGS AND GROUNDS

Buildings and grounds considered for purchase or construction by the Board or currently owned by the school district and used for the education program must meet, or upon improvement be able to meet, the specifications set by the Board. The Board will make this determination.

Prior to remodeling or other construction of buildings and grounds, the Board may appoint a committee of consultants, employees, citizens, or others to assist the Board in developing the specifications for the new or improved buildings and grounds. These specifications will be consistent with the education program, and they will provide the architect with the information necessary to determine what is expected from the facility. It will be within the discretion of the Board to determine whether a committee is appointed.

The education specifications will include, but not be limited to, the financial resources available for the project, the definition and character of classrooms, the functional use to be made of the rooms, description of specialized needs, and other pertinent information as the Board deems necessary.

It is the responsibility of the Superintendent to make a recommendation to the Board regarding the specifications of buildings and grounds.
