

SAYDEL COMMUNITY SCHOOL DISTRICT

COMMUNITY RESOURCE PERSONS AND VOLUNTEERS

The Board recognizes the valuable resource it has in the members of the school district community. When possible and in concert with the education program, members of the school district community may be asked to make presentations to the students or to assist employees in duties other than teaching. Background checks must be completed annually prior to placing a volunteer in a position to work one-on-one with any student.

Any volunteer who chaperones students on an overnight, or extended school day/weekend trip will be required to have a satisfactory background check on file with the district for that school year. Volunteers in other situations would be considered as under the supervision of district staff. The school district may officially recognize the contributions made by volunteers.

Recruitment, training, utilization, and the maintenance of records for the purposes of insurance coverage and/or recognition of school district volunteers are the responsibility of the Superintendent or his/her designee.
